

Imagery Solutions for Energy Companies

Australian-based Geoimage together with Spatial Energy, headquartered in the United States, have partnered to better serve the Australian Energy Industry.

Together, we are a one stop source for digital imagery and services within the energy industry. Dedicated to meeting the needs of local and global energy companies operating within the Australasian region, our partnership will acquire, process and manage the most extensive collection of high resolution satellite and aerial imagery, topographic maps and digital elevation models. With this in mind, we have great pleasure in introducing our latest program: Spatial On Demand®.

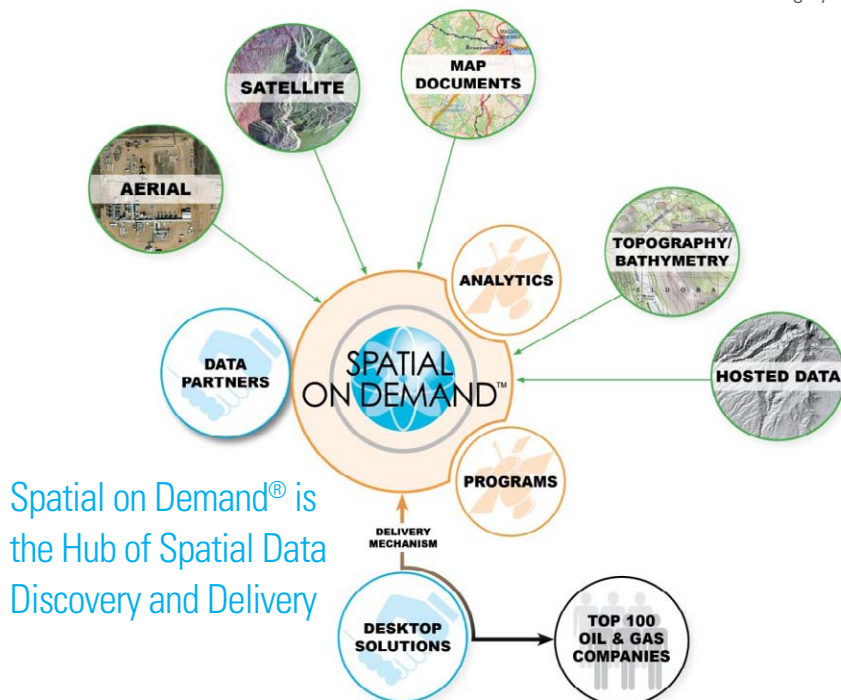

Spatial On Demand® integrates vast archives of geospatial data such as satellite imagery, aerial photography, topographic maps and DEMs into a single online database.

Successful energy companies have an intimate understanding of their focus areas of exploration, production and development, both onshore and offshore, from a mapping, elevation and logistics perspective.

Spatial on Demand® provides energy companies with an enterprise-wide solution that allows users to quickly and easily find and access imagery, elevation, geologic and other data sets—directly in the workflow they already use.

Search, Sort, Select and Share the data you need to understand and manage your spatial assets — Spatial on Demand® will look after your data.

Spatial on Demand® is the Hub of Spatial Data Discovery and Delivery

"We use Spatial on Demand® to have a single global view with 24/7 access for all of our global users. With the size and breadth of our operations, a single repository has saved us hundreds of thousands to millions of dollars in duplicate purchases and more importantly, saved us from poor decisions in the exploration and delivery of energy"

— Director Global GIS Services, Fortune 100 Oil and Gas Company

ADVANTAGES

Spatial on Demand® delivers project-ready data sets that Oil, Gas and Mining customers use - including imagery, elevation and geology sets.

- World's best collection of imagery for Energy companies
- Fixed subscription services including training and reporting
- No new software, hardware or maintenance costs
- Seamless integration with all the major desktop applications
- Private data hosting
- Now offered as Global Web Map Service (WMS) to download combination packages

With local support and expertise from our Brisbane and Perth offices, contact Geoimage today on sales@geoimage.com.au.

SPATIAL ON DEMAND®
get global imagery now

Through Spatial On Demand®, you can quickly search, view and retrieve geospatial data customised to your specifications. Spatial On Demand® also allows you to locate other imagery datasets for purchase over your project sites located anywhere. In addition, we can host all of your imagery data online, both public and private datasets.

A centralised, secure site that can be accessed by all of your users, data can be accessed and shared using *Google Earth, ESRI, Global Mapper, Petra, Geographix, Mapinfo, GeoSoft* and others recommended by Geoimage. Spatial on Demand® will:

- Provide enterprise wide access for consistent data analysis
- Reduce internal administration and costs
- Improve decision making through high speed access to imagery.
- Facilitate search and acquisition of new imagery from the broad range of Geoimage's vendors

Additionally we provide premium image processing services from simple image mosaicing, orthorectification using ground control points and digital elevation models (DEMs) to data fusion, data conversion, image registration and data editing. Image analysis services include feature extraction (e.g. facilities, transportation, land use/land cover, vegetation types and disturbed features); change detection (temporal sequence of imagery); and extraction of contours, hillshades and slope/aspect from DEM data.

We also provide the highest level of customer service. Our team has many years of experience within the energy and mining industries. Serving as a consultant on your project, our staff leverage their industry experience and knowledge to deliver the best solution to meet your objectives.

SPATIAL ON DEMAND® FOUNDATION DATASETS

IMAGERY

- Bing Maps Content
- Global Landsat Natural Colour and Enhanced Colour Coverage
- Google Global Base Map Layers

TERRAIN

- SRTM Global Coverage
- ASTER GDEM v2
- Australian Raster Topo Maps

GEOLOGY

- USGS World Geologic Maps
- Australian Geological Maps
- Australian Gravity Anomaly Grids
- Australian Radiometric Data Layers
- Australian Magnetics Layers

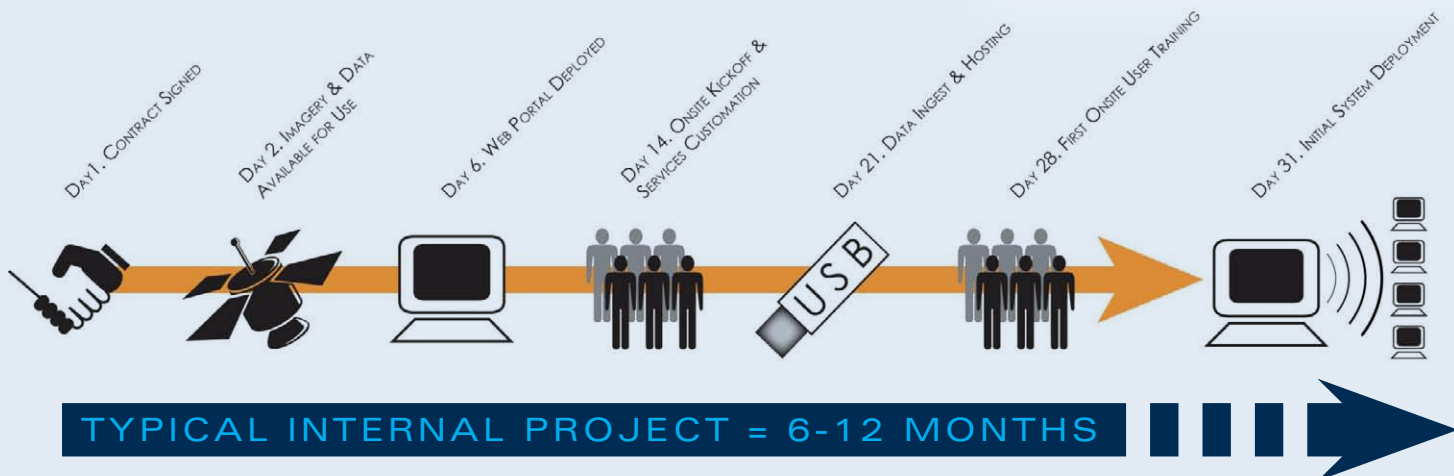

REFERENCE

- GEBCO Global Bathymetry
- Australian Bathymetry Layers

Premium Content Available Includes:

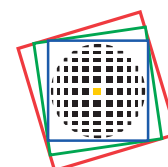

- Geoimage's ClearView Suites
- Geoimage's Boggy Index (Soil Layers)
- High Resolution Imagery layers
- Detailed Bathymetry Layers

IMPLEMENTATION TIMELINE

Why wait? Call us today or email sales@geoimage.com.au to find out how Spatial On Demand® can become a strategic asset for your company.
